

DAILY FOR THE DIRECTOR OF LOGISTICS

In response to an inquiry from Senator John Warner concerning items of concern in the vicinity of the Claude Moore Colonial Farm and the area used by the New Building Contractor for parking and access to the construction site, I contacted Mr. Andy Wahlquist, Senator Warner's Chief Aide. I explained to him that I had directed the Contractors to clean up the area immediately and to keep it clean in the future. In addition, HOME is investigating with the Office of Security, a plan to repair and fix up the rusted fence which runs along CIA property line in this area. Also, I explained that the construction signs were for vendor and subcontractor delivery purposes rather than advertisement, but I would attempt to find a way to make them less offensive to the sight of the farm visitors.

I offered to meet with Mr. Wahlquist or his representative at his convenience, but Mr. Wahlquist did not indicate that this was necessary. Rather, he suggested that when Senator Warner came to the farm for a dedication ceremony on 1 July 1985, he may want to come an hour earlier and visit our construction site. I told him I would be pleased to assist him in this matter and gave him my telephone number in order that we can work out the details for the visit.
